

Build Your Career. Sustain Our Forests.

Come train with us.

New Brunswick forestry sector supports

24,000

direct, indirect, and induced jobs in every region of the province

Modern Equipment Expertise

Gain hands-on experience with the latest cutting-edge machinery designed for modern timber harvesting. Our program ensures you're equipped to handle the advanced equipment used in today's forestry jobs.

Safety First

Prioritize safety with comprehensive training that equips you with industry-leading practices and protocols. Learn how to identify risks, prevent accidents, and create a secure work environment.

Sustainability Insights

Develop an understanding of balancing efficient timber harvesting with responsible environmental stewardship to protect ecosystems, ensure resource renewal.

Skilled Workers in Demand

Prepare for a rewarding career in a booming industry with a growing need for skilled professionals. Gain the expertise to excel in roles such as forestry machinery operation, silviculture, and logging labor, ensuring you're ready to meet the demands of a competitive job market

FACTS

New Brunswick's forest sector contributes to and facilitates significant economic activity and employment opportunities in **every region of the province.**

70+ New Brunswick communities are supported by forestry operations

More than 10,000 New Brunswick residents are directly employed in the forestry sector, with an additional 16,000 people employed indirectly.

Our Programs

The Forestry industry is growing.
Are you ready to lead it?

12-WEEK MECHANIZED FORESTRY PROGRAM

In this 12-week program, you'll focus on one forestry machine of your choice: harvester, porter/forwarder, or thinning machine (mini excavator with a specialized shear head). The program is designed to maximize hands-on practical training and prepare you for an entry-level position in the field.

By the end of this course, participants will be able to:

- Promote sustainable practices in tree harvesting operations.
- Assess harvest and pre-commercial thinning sites effectively.
- Understand and apply operating responsibilities, principles, and methods to ensure quality in forest harvesting and pre-commercial thinning.
- Evaluate worksite areas and address potential hazards proactively.
- Perform basic preventive maintenance and repairs on forestry equipment.
- Follow health and safety protocols that address both individual and team needs.
- Adhere to regulatory requirements and established forestry harvesting standards.
- Operate equipment safely and efficiently on-site.

FEES: \$14,700 offering a \$2,000 Bursary for eligible students

16-WEEK MECHANIZED FORESTRY PROGRAM

Internship

In this 16-week program, you'll complete the 12-week curriculum while selecting two machines for hands-on practical training. The final 4 weeks include an internship, where you'll work with a contractor on a specific machine at an actual job site.

FEES: \$19,950 offering a \$6,650 Bursary for eligible students
